Please Note: Not suitable for sea water environment. We reserve the right to alter cabinet specifications and dimensions. Please contact our local representative for updated approval drawings prior to base construction and ordering.

* **Galvannealed steel:** The preferred coated steel for use in architectural applications.

- Coated in zinc, heated to over 1000° F so iron is pulled from steel.
- Iron mixes with zinc coating, making it harder, more scratch-resistant, uniform appearance.
- Galvannealed steel bonds better with paint, and it is better for welding.

Example: CM-1101 shown with one shelf. Accessories not available.
